Awarding of Degrees

Each BCOM student must complete to the satisfaction of the Osteopathic Medical Student Performance Review Committee (OMSPRC) and faculty all course work and clinical requirements. The OMSPRC will meet each spring to confirm the list of graduating seniors who have completed or will complete all requirements for graduation. The list is then presented to the Faculty Council, who will present the list to the General Faculty for a final vote recommending students for graduation. Following Faculty approval, the list of students recommended as recipients of the degree "Doctor of Osteopathic Medicine" is forwarded to the Dean/Chief Academic Officer for transmittal to the Board of Trustees for approval.

Upon approval, the Board will take formal action to approve the conferring of the degree of Doctor of Osteopathic Medicine to medical students from that class.
