

BURRELL COLLEGE OF OSTEOPATHIC MEDICINE

STANDARD OPERATING PROCEDURES

Post Examination Review		SOP #: PCE.017.02
Effective Date	1/7/2019	
Last Revision/Review	Revised 7/1/21	

1. Purpose

This SOP describes the procedure for analysis of a written exam's statistical data (measures of central tendency, reliability coefficient, and individual item performance) after delivery of a written examination. This procedure is in place to assure a valid, reliable, and fair assessment process across all first and second year science courses.

2. Related Policy/Authority

3. Faculty/Staff Responsibilities

Department of Evaluation & Assessment/Course Directors/Faculty/

- Analyze exam statistics to identify low performing questions according to these procedures.
- Communicate with the Testing Center on any changes necessary to the exam's scoring.

Testing Center personnel will

- Deliver a list of low performing questions (defined below) to faculty and course directors.
- Make modifications to exam scoring based on faculty feedback and the exam analysis process.

4. Definitions/Abbreviations

Examination Item - a question prepared and submitted for use as part of a graded assessment tool (examination, test, quiz, or other).

Flawed Item - a question deemed to have multiple correct answers; no correct answer; insufficient information provided to determine a correct answer, or other errors that prevent the item from effectively assessing student knowledge of associated objectives.

Low Performing Question (LPQ): any item for which mean student performance falls below 0.5 (50%).

Point BiSerial (PBS) – discrimination correlation statistic indicating question difficulty.

5. Procedural Steps

1. After students have completed an assessment and the submitted assessment has been scored by ExamSoft, the Testing Center personnel creates Low Performing Question (LPQ) reports for each question creator, as applicable. Appropriate faculty/administration will receive an email, with an attachment identifying their LPQ(s) along with performance data pertaining to the item(s), and a date as to when responses are due. The question creator must respond within the indicated time frame with a recommendation to remove or retain the question in the exam, along with a specific justification of their recommendation.
2. Any item deemed to be unanswerable, for any reason, including, but not limited to, absence of correct answer choices; multiple correct answers; major typographical mistakes in the item; insufficient

STANDARD OPERATING PROCEDURES

information provided in the item stem; omission of an image, data table, or other addendum that provided necessary information in the published exam; etc., will be removed from the exam thus decreasing the point value of the assessment by one point for each deleted item.

3. The following guidelines are recommended to faculty when considering how to manage a LPQ.

<u>Performance</u>	<u>PBS</u>	<u>Recommendation</u>
Between 0.40 and 0.50 AND	Negative	Remove from exam
Between 0.30 and 0.40 AND	Less than 0.05	Remove from exam
Between 0.20 and 0.30 AND	Less than 0.1	Remove from exam
Less than 0.20 AND	Less than 0.15	Remove from exam

4. Upon receiving responses from the question creator, LPQ recommendations will be reviewed by both the Course Director and Assistant Dean of Student Assessment. The Course Director(s), in collaboration with the Office of Pre-Clinical Education, will make the final determination of the status of any LPQ item(s).
5. As a result of this review, any item deemed to be flawed will be dealt with in the following manner:
- Upon receiving the decision from the Course Director (or Office of Pre-Clinical Education authority), the Testing Center personnel will make necessary adjustments to the exam(s).
 - The LPQ will be removed from the exam.
 - The total points on the exam will be decreased by 1 point
 - The Testing Center personnel will enter an LPQ comment in the 'Internal Comments' in the ExamSoft entry for that question, thus notifying the Question Creator that the question needs to be reworked before the question can be used on another exam.
 - The Question Creator will indicate what changes have been made to the question (or in the delivery of the content) in the "Internal Comments" before the flawed question is used on another exam.

6. Reports/Charts/Forms/Attachments/Cross References

7. Maintenance

The policy will be maintained by the Department of Evaluation & Assessment and reviewed by Curriculum Committee as needed.
